ABOUT ME

As a Software Engineer, I bring a strong commitment to collaboration and a genuine passion for building innovative solutions. My problem-solving and analytical skills enable me to tackle complex challenges with creativity and efficiency.

To maintain a healthy balance, I find pleasure in activities such as yoga, reading, surfing, climbing, and hiking.

WORK EXPERIENCE

Project Support ERP Migration

2023- current

DZB | Gemeente Leiden

I facilitate the new ERP system's implementation by planning, testing, and creating user guides. I also support the financial department and help employees adjust to the new system.

Software Engineer

2022-2023

Agriplace

In the "Farm" project, which aimed to create a software solution for certifying farmers, I contributed to the development of the user interface, utilizing the following components:

CSS, Material-UI, React.js, TypeScript, Redux, PostgreSQL, Cypress, Git, GitHub, Jira, Swagger, Camunda orchestrator, AWS, Figma

I made significant contributions to the design and development of essential BPMN workflows, which serve as the foundation for the implementation of the automated Camunda BPMN orchestrator.

Junior Software Engineer

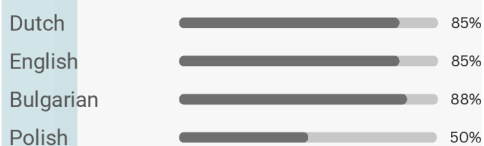

2021-2022

Filogic TMS

As a junior developer, I contributed to the ongoing development of a Transport Management Software. I implemented API integrations with various external applications that are crucial for the users. In this process, I worked with the following tools:

ASP.NET Boilerplate, Angular, JavaScript, New Relic monitoring, SQL Server, Git, GitLab, Hubspot, Selenium WebDriver, Swagger

LANGUAGES

WORK EXPERIENCE

Financial Chief Clerk

2019 -2021

Hilton

As the Chief Clerk, I handled both the general hotel administration and the payroll administration. I found it incredibly enjoyable to prepare periodic reports and collaborate with the Cluster Manager to establish the annual budgets.

Additionally, I have overseen multiple projects, including the transition to new point-of-sale systems, their implementation, and the switch to a new payment service provider.

I assisted in setting up the concept of a mini-market within the hotel. This involved determining the renovation budget, making initial large purchases, identifying the essential products to sell, and closely monitoring the actual sales through periodic reports and revenue analysis.

Back-Office Manager

2018-2019

Accor Hospitality

In my role as Back-Office Manager, I provided support in the area of finance, including overseeing the accounts payable, accounts receivable, and payroll administration for the hotel. Additionally, I served as the primary point of contact for guests, handling all of their inquiries or feedback.

Office Manager

2017-2018

Accor Services

As the Office Manager, I was responsible for various administrative and organizational tasks, including supporting the finance and legal departments, scheduling meetings, arranging travel accommodations, and coordinating staff housing. Additionally, I organized corporate events and ensured that all our visitors were welcomed warmly.
